

Through my practice as a bariatric surgery dietitian, PhD in health psychology, bariatric program coordinator, and advocate for access to care for people with obesity, I strive to represent all Integrated Health members and future members of the ASMBS and the patients we serve. I'll continue to work with the leadership of ASMBS Integrated Health to strengthen the involvement of integrated health in state/regional chapters, promote the role of access to care for all members of the interdisciplinary team, and advance the communications through internal and public facing platforms to support and promote ASMBS IH. I hope to use my creativity, authenticity and intensity to lead and support you for years to come!
